

PRESS RELEASE

Luminox 35th Anniversary Heritage Collection

June 2024 – Celebrating a legacy in military watchmaking, Luminox will release three timepieces throughout May and June 2024 for its 35th Anniversary, honouring the brand's connection with the military and their heritage of supplying high performance first-line military equipment.

Luminox embraces the history that has shaped its journey and their watch collections that continue to resonate with elite units and maritime commandos globally. Each timepiece is an evolution of previous hero watch models that represent the 3 territories that military units around the world typically operate in: SEA, AIR and LAND.

The journey begins at sea, where Luminox and the Navy SEALs first forged their alliance. The Navy SEAL Original 3001.H (heritage) watch revisits history with a revamped tribute to the very first Navy SEAL model. Coloured in red, the "30" on the bezel signifies three decades since Luminox's Original Navy SEAL 3000 watch released in 1994. The second hand, adorned with a bold red arrow tip, dances across a sapphire glass face for increased readability. The improved quality movement of the Swiss quartz ETA movement, and a stainless-steel bezel, embodies the brand's relentless pursuit of high-performance, robust watches.

Taking to the skies, Luminox will launch an honorary pilot model, the F-117 Nighthawk x Skunk Works 6442.H. Inspired by the pilots who flew the stealth fighter jets, and approached Luminox almost 25 years ago, this AIR timepiece marries the iconic design with 'Skunk Works®' innovation. The Skunk Works® logo on the dial at 6 o'clock is barely visible during the day, but at night it remarkably lights up in Super-LumiNova® to pay homage to the unit's vital role in advanced technology solutions and innovation. The reversed numbers on the bezel and dial means the watch can be read in two different time zones, which ensures that this timepiece becomes a companion not just for Air Force pilots but for everyday adventurers seeking the extraordinary. The Skunk Works®

logo is engraved on the case back.

The celebration reaches its peak on land with the RECON Point Man 8825.H. Honouring those at the forefront of recon units, this sophisticated LAND watch serves as a simple and efficient navigation tool for military personnel and adventurous explorers that want to navigate different terrains. With cardinal points on the inner bezel, a tachymeter to measure walking speed, and kilometre (KM) and miles (MI) markers on the dial, the Point Man empowers explorers to lead with precision and confidence.

As Luminox celebrates their rich history, each watch becomes a chapter in a legacy built on precision, innovation, and the enduring partnership with the world's elite forces. Where the spirit of the military meets Luminox, where time meets extraordinary craftsmanship. Finally, all timepieces are equipped with the renowned Luminox Light Technology, allowing time to always be visible no matter the conditions or the darkness of nights. This was a key reason why Nick North, the Assistant Officer to the Research, Development, Test and Evaluation (RDT&E) unit for the elite military, chose Luminox as the most dependable watch for the unit's special operations. The collaboration between Luminox and the elite military continues to be a strong partnership.

Luminox Navy SEAL Original 3001 Heritage

Luminox Navy SEAL Original 3001 Heritage – 3001.H.SET

About Luminox

Luminox, the original self-powered luminous watch brand, is the watch of choice for global outdoor adventure icon Bear Grylls, military units, The Icelandic Association for Search and Rescue (ICE-SAR), F-117 Nighthawk™ stealth and other jet fighter pilots, elite forces worldwide and professional divers. Luminox watches glow up to 25 years in any light condition. Always Visible, tough, powerful and accurate, Swiss-Made Luminox is the ultimate night vision gear for rugged outdoorsmen and other peak performers.

ALWAYS VISIBLE

Navy SEALs, law enforcement, emergency personnel and more wear Luminox watches, and these professionals need to be able to see the time no matter the conditions. That's why Luminox uses tiny tritium gas tubes, which will provide illumination for up to 25 years. Unlike other luminosity systems, which depend on exterior light sources to charge luminous paint or a pushbutton to illuminate the watch, the luminosity is built right into Luminox watches, ensuring that you will always be able to see the time, no matter the conditions.

AVAILABILITY

Luminox watches are available at Crystal Time Pavilion at VivoCity #01-K30, TANGS at Tang Plaza Level 3 and authorised watch retailers.

For further information and the list of authorised retailers, please call Crystal Time (S) Pte Ltd at +65 6747 8888 or visit the website at www.luminox.com.sg
